

ANSHIKA GUPTA

anshikagupta379@gmail.com | [LinkedIn](#) | [Portfolio](#) | [GitHub](#) | +91 8824623961

SKILLS

Languages: Python, SQL, C++, JavaScript

Data Science & AI: Pandas, NumPy, Scikit-learn, TensorFlow, PyTorch, NLP, LLMs, Hugging Face, LangChain (RAG, Agents), Databricks

Cloud & Deployment: AWS (S3, SageMaker, Lambda, EC2), FastAPI, Docker, Jenkins, Git, Bitbucket | Familiar with Azure & GCP

Data Visualization & Databases: Power BI, Tableau, Amazon QuickSight | PostgreSQL, SQL Server, MySQL

EXPERIENCE

Data Scientist

Jul 2025 – Present

EXL Services

Noida, Uttar Pradesh

Client Operations (Leading Australian Insurance Provider)

- Deployed and productionized [ML pipelines](#) on [Databricks](#), ensuring reliable execution of scheduled jobs
- Utilized [CI/CD workflows](#) with [Bitbucket](#) and [Jenkins](#), including pull request-based integration and tag-based deployments across environments (Dev → Staging → Prod)
- Collaborated with ML Engineers to deploy and validate ML models across production environments.
- Monitored and debugged [Databricks jobs](#), identifying [failure patterns](#) and improving pipeline reliability
- Managed change requests, incidents, and sprint tasks using [Jira](#), ensuring smooth cross-functional collaboration

AI-Powered Runbook RAG System

- Built a [GPT-5.1](#)-powered [RAG](#) system for [Databricks alerts](#) and [ServiceNow \(SNOW\)](#) incidents.
- Implemented [context-aware chunking](#), [ADA-002 embeddings](#), [FAISS](#) vector search, and [application-level filtering](#) for runbook retrieval from [Confluence](#).
- Matched incidents with historical SNOW records to identify similar incidents and generate AI-powered summaries.
- Reduced L1 investigation time by [~80%](#), surfacing relevant runbooks and historical fixes within seconds.

AI-Powered Insurance Assistant (Agentic RAG + SQL + Dashboard Bot)

- Built an [agent-based assistant](#) using [NVIDIA Nemotron-30B](#), with [RAG](#), [NL2SQL](#), and context routing for insurance queries.
- Implemented [Qdrant](#) vector search, client-level filtering, and read-only SQL safeguards for secure, accurate retrieval.
- Enabled [natural language dashboard queries](#), allowing users to retrieve KPIs and business insights through chat.
- Delivered [low-latency \(~3s\)](#) responses through an optimized retrieval and orchestration pipeline.

Data Scientist

Oct 2024 – Jun 2025

JSimple Technosoft

Noida, Uttar Pradesh

- Built scalable data pipelines using [SFTP](#) and [AWS EC2](#), enabling real-time ingestion and processing of workforce payroll data
- Processed and transformed [15M+](#) records across [500+ fields](#) in [PostgreSQL](#) (cleaning, joins, normalization, [feature engineering](#) and custom calculation logic for attrition metrics) to deliver analysis-ready datasets
- Developed predictive dashboards in [Amazon QuickSight](#) for [Qess Corp](#) (one of India's largest staffing firms), delivering workforce analytics (attrition, onboarding, requisition) for [500K+ employees](#) and replacing manual reporting
- Fine-tuned [LLaMA 3.2](#) to build an AI-powered HR chatbot, improving query accuracy by [35%](#) and reducing HR workload

Data Analyst Intern

Feb 2023 – Apr 2023

Forvis Mazars

Gurgaon, Haryana

- Analyzed financial data from [ERP/CRM](#) systems using [SQL](#), ensuring accurate, timely audit reports
- Automated data cleaning and developed custom [KPIs](#) with [Excel Macros](#) and [DAX](#) in [Power BI](#), boosting efficiency by [30%](#)
- Led an intern team to develop an [ML-based anomaly detection](#) model for [audit analytics](#), collaborating on [feature engineering](#) and [model evaluation](#)

PROJECTS

1. **End-to-End TMDb Movie Reviews Sentiment Analyzer:** A [FastAPI](#) application that analyzes movie review sentiments using the [Hugging Face Inference API](#) and [TMDb Review API](#). It fetches reviews by movie title, classifies them concurrently using a [RoBERTa-base sentiment model](#), and presents visual [sentiment breakdowns](#) plus a [confidence-weighted sentiment score](#) alongside movie details. Deployed on [Vercel](#) for fast, serverless access. [Link](#)

2. **Crop Disease Prediction using Deep Learning:** Developed a custom [CNN](#) model using the New Plant Diseases dataset (87,000+ RGB images, 38 classes), achieving [97% accuracy](#). Built a diagnosis and treatment recommendation system for 14 crops and 26

diseases using [TensorFlow](#), [Keras](#), [FastAPI](#), and a lightweight HTML/CSS/JS frontend, and evaluated performance against popular CNN architectures. [Link](#)

3. Customer Segmentation and Recommendation System: Analyzed a transactional database (541,908 entries) using EDA and PCA, built a recommendation system with collaborative/content-based filtering, and used [K-means clustering \(RFM\)](#) to analyze customer behavior, validated with [silhouette scores](#), [elbow method](#) and [radar charts](#) [Link](#)

4. Credit Card Fraud Detection Model (99% Accuracy): Achieved [99% accuracy](#) on a [PCA](#)-transformed dataset (284,807 transactions), corrected class imbalance with [Borderline SMOTE](#), and compared mean amounts using [t-test](#). Applied [Logistic Regression](#), [Naïve Bayes](#), [KNN](#), and [Random Forest](#), evaluated with [Accuracy](#), [Precision](#), [Recall](#), [F1](#), [AUC](#), and [z-test](#) [Link](#)

5. Power BI Analysis of IPL Performance and Trends: Descriptive analysis of IPL data of the decade, included [DAX](#) for custom calculations, filters, slicers and pivots creating charts, insights, dashboard and plots. Provided prescriptive insights [Link](#)

EDUCATION

B. Tech in Computer Science (Specialization: Data Science), CGPA: 8.75	Oct 2020 – Jun 2024
The NorthCap University	Gurgaon, Haryana
CBSE Class XII - 90%	2018-2019
Modern Public School	Bhiwadi, Rajasthan
CBSE Class X - 10 CGPA	2016-2017
Modern Public School	Bhiwadi, Rajasthan

ACCEPTED PUBLICATIONS

Gupta, A., Solanki, D. (2023). Crop Disease Prediction using Deep Learning. Accepted by the International Journal of Innovative Science and Research (IJISRT)

CERTIFICATIONS

Databricks Certified Generative AI Engineer Associate [Link](#)

Google Cloud – Build GenAI Solutions using Model Garden models and APIs [Link](#)

Google Cloud – Deploy an Agent with Agent Development Kit (ADK) [Link](#)

AWS Academy – Machine Learning Foundations [Link](#)

SAFe® 6 DevOps Practitioner [Link](#)
